

## **ABSTRACT**

A Web browser includes a group bookmarks feature allowing accessing and displaying groups of bookmarks from at least one remote location (location(s) remote from the local computer system upon which the Web browser is running).

- 5 The groups of bookmarks may be groups stored in at least one files accessible in a directory on a remote computer system that is coupled to the user's local computer system via a network. Alternatively, the groups of bookmarks may be part of a Web page that is accessible from the local computer system.
